Minutes: Chairman Keiser: called the meeting to order on HB 1199. All committee members were present.

Representative Ekstrom, District 11: was present and gave a written testimony in favor of HB 1199. **(SEE ATTACHED TESTIMONY).**

Representative Kasper: What would this department do, it appears to me that it is sort of like a recruiting or marketing division, do you have some ideas that you think that it ought to be doing that it is not doing now.

Representative Ekstrom A: I do, needs more work.

Representative Johnson: Did you check to see if Wyoming or any other state convention have some kind of division in their commerce department or economic development department.

Representative Ekstrom A: No I did not.

Representative Froseth: This bill also overstrikes quite a bit of language of present statute can you briefly explain why the deletion of several lines.

The micrographic images on this film are accurate reproductions of records delivered to Modern Information Systems for microfilming and were filmed in the regular course of business. Representative Ekstrom A: I will ask LC why they did that, I think they were cleaning up the area, I won't call it housekeeping but I believe that is what they were doing.

Representative Froseth: I would like some clarification.

Representative Gulleson: was present and wanted to lend her support and voice to this concept of the division of population growth. All of my comments are centered around the population projection book that was put out by the ND data center. We fall behind every state in the union on population growth. My greatest concern is that when you look at the states surrounding us and that they see real growth and we are left behind the last few years of the economic growth of the nation.

Representative Tieman: was present and gave testimony on HB 1199. My district is considered very much rural, I stand in front of you this morning in support of 1199, which would create a divisional population growth within the department of commerce. I believe that this is the kind of legislation that we really need. We need to think outside the box. Among its many provisions it would offer tax incentives for those willing to relocate to the great plain states like ND.

I believe that HB 1199 is a significant step to create solutions to problems in ND.

Jack McDonald, NDNASS: appeared in support of HB 1199. The ND Newspaper Association did participate back in 1915 and some of the original activities to try to increase population of ND. Over the past several years, some of the newspapers in the state have participated in various economic growth, initiatives on their own. The NDNA would like to stay in support of any effort to try and increase population in the state.

Marilyn Foss, ND Bankers Association: appeared in support of the bill and wants to bring more focus to the issue and bring economic growth.

The micrographic images on this film are accurate reproductions of records delivered to Modern Information Systems for microfilming and were filmed in the regular course of business. Hearing Date 1-22-03

Greg Tschider, ND Credit Union League: I would like to say me to, for the comments made to far, credit unions of ND are extremely concerned and support any bill that would benefit the state.

Don Forsberg, Vice-President, ICB of ND: appeared in support of the bill, how do we bring the people in to fill the jobs that are already here?

Pat Ward, Lobbyist: I'm here not as a lobbyist but as a citizen of ND, when I was 24 I moved to ND, I feel very strongly that ND is a great place to live, and we don't sell ourselves enough. And I do think that an investment of 230,000 dollars to get people to move here and get educated here, is a small investment.

Dale Anderson, GNDA: appeared in support of the bill, 2 years ago we were discussing if ND should create a ND Department of Commerce, and out of that deliberation, you created that department. You also created a foundation and charged that foundation with putting together a strategic plan and that group has done that. HB 1199 sends a strong message to the Dept. of Commerce as well as to the Secretary, and urge a Do Pass on HB 1199.

No opposition present on the bill. Hearing closed.

Chairman Keiser called for committee work on HB 1199 Wednesday afternoon. Chairman Keiser stated that he supports the concepts promulgated within this but knows that Appropriation won't fund this legislation. He suggested that a subcommittee (Rep. Ekstrom, Severson & Tieman) work with the Lee Peterson and the Department of Commerce to work out a fiscal note.

Minutes: Chairman Kelser called for committee work on HB 1199.

Rep. Ekstrom: We tried to rescued this by increasing the cigarette tax \$.01 which could produce \$860,000 in revenue per biennium. We're using the second fiscal note that was prepared.

Rep. Ekstrom moved to adopt the amendments. Rep. Zaiser seconded the motion. A voice vote was inconclusive. Results of the roll call vote were: 6-8-0. The motion failed.

Rep. Severson moved a Do Not Pass.

Rep. Klein seconded the motion.

The results of the roll call vote were 10-4-0.

Rep. Klein will carry this on the floor.

Political Subdivisions

North Dakota House of Representatives  
Industry Business and Labor Committee  
George Keiser, Chairman  
HB 1199 / Division of Population Growth  
January 22, 2003

Good Morning Chairman Keiser and members of the IBL Committee. For the record, my name is Representative Mary Ekstrom and I serve District 11 in Fargo.

I am here to introduce for your consideration HB 1199 which creates a Division of Population Growth under the Department of Commerce.

You may wonder why someone from Fargo which grew by 19% in the last census period would care about population growth. For that matter Cass County with 123,138 people is fully 44% larger than the second largest county in North Dakota (Burleigh). It is a question of long term sustainability. West Acres and all of the other amenities that Fargo has to offer will not thrive if North Dakota's population does not grow.

In the past few years while serving on Administrative Rules, IBL and the Political Subdivisions committees I have listened to the problems that beset our state. You have also heard that insurance companies are leaving, schools are consolidating, and townships face difficulties in maintaining their roads and other essential services and the list goes on and on. You, on this committee understand the problems of our state, as well as, or better than I do.

Last May, I convened a bipartisan group of like minded legislators to discuss the future of North Dakota. One member of the panel came up with a comment that has stayed with me. *"We simply do not have enough 'per capita' to sustain all the services that must be provided for our citizens."*

The micrographic images on this film are accurate reproductions of records delivered to Modern Information Systems for microfilming and were filmed in the regular course of business. The photographic process meets standards of the American National Standards Institute (ANSI) for archival microfilm. NOTICE: If the filmed image above is less legible than this Notice, it is due to the quality of the document being filmed.

1/22/03  
Date

We focussed in the past on economic development and job creation - almost entirely. **These efforts are important and must continue.** However, I believe that there is another component: people. I have heard over and over again of economic development plans which have failed because we do not have enough people to fill the available jobs. We heard from Job Service last week that 1200 tractor trailers remain idle for want of drivers. Our effort must be a two pronged approach.

It involves marketing, entrepreneur development, asset assessments, and faith. In North Dakota self promotion is considered a sin and bragging about your state is almost sacrilegious. I understand the roots of the philosophy but as leaders we must tell our citizens that self promotion will have a positive impact on their future.

I watched the Saving North Dakota program the other night and have read the continuing series in the Fargo Forum. There are people, even young people, who want to continue to work for North Dakota's future. They represent a resource for the new Division of Population Growth, to talk about what makes people stay, what would bring more people, and what do we need to do.

I also attended the excellent population conference at Dickinson State last year where authorities from all over the country gathered to discuss the population problems of the state and region. Again, here is a source of excellent information to help drive public policy.

I don't want to load you down with statistics and demographic trends. If you will look, however, at this chart in your packet. This was produced by the North Dakota League of Cities. They were recalculating state aid distribution and had to create a new category "A-1" for Fargo in order to level the playing field for all of the other cities.

More alarming, however, are the comparisons in growth from 1990 to 2002 of the second, third and fourth tier cities. Class B includes Dickinson, Jamestown, Mandan, Williston and West Fargo. All of the western cities except Mandan lost population. Moving down to the Class C cities (population 6,000 to 8,500) Wahpeton, Devils Lake, and Valley City all lost population.

The micrographic images on this film are accurate reproductions of records delivered to Modern Information Systems for microfilming and were filmed in the regular course of business. The photographic process meets standards of the American National Standards Institute (ANSI) for archival microfilm. NOTICE: If the filmed image above is less legible than this Notice, it is due to the quality of the document being filmed.

*Dorinda Haldrup*

10/2/03  
Date

Of the 39 cities classified as Class D with populations of 1000 to 4500 people, only 7 gained in population while the other 32 lost. The downward trend grows steeper as the cities grow smaller.

We know about this crisis. This committee represents the whole state. Representatives Kasper, Zaiser and I are from Fargo with 90,599 people. On the other hand, Representative Tracy Boe is from Mylo with a population of 19. We see the fallout from this lack of critical mass in almost everything we try to do as legislators.

It is not acceptable for the states around us to grow while we lag behind. I have included a table from the U.S. Census Bureau. You can see that Minnesota, Montana, South Dakota and Wyoming all grew far more than we did in the last ten years.

Ever since I ran for office for the first time in 1996, I have worn a small buffalo on a chain. I have had some people ask me why. Others assume I wear it because I attended NDSU. This small icon goes with me everyday to remind me to work on growing the state, or North Dakota will indeed become a Buffalo Commons. I have brought a small reminder for each of you as well.

In closing, I would respectfully request a DO PASS recommendation for HB 1199. Mr. Chairman, thank you for the opportunity to present this information. I will try to answer any questions the committee may have.

The micrographic images on this film are accurate reproductions of records delivered to Modern Information Systems for microfilming and were filmed in the regular course of business. In percentage terms, the population increase of 13.2 percent for the 1990s was higher than the growth rates of 9.8 percent for the 1980s and 11.4 percent for the 1970s. The 1990s growth rate was similar to the 13.4 percent growth in the 1960s and was well below the 18.4 percent growth for the 1950s.

**West grew fastest in the 1990s; South reached 100 million.**

Population growth varied significantly by region in the 1990s, with higher rates in the West (19.7 percent) and South (17.3 percent) and much lower rates in the Midwest (7.9 percent) and Northeast (5.5 percent).<sup>1</sup> The West increased by 10.4 million to reach 63.2 million people, while the South grew by 14.8 million to a population of 100.2 million people. The Midwest gained 4.7 million to reach 64.4 million people, and the Northeast's increase of 2.8 million brought it to 53.6 million people.

Because of differences in growth rates, the regional shares of the total population have shifted considerably in recent decades. Between 1950 and 2000, the South's share of the population increased from 31 to 36 percent and the West increased from 13 to 22 percent. Meanwhile, despite overall population growth in each of the past five decades, the Midwest's share of total population fell from 29 to 23 percent and the

<sup>1</sup> The Northeast region includes Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont. The Midwest includes Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin. The South includes Alabama, Arkansas, Delaware, the District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia. The West includes Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.
